

RFP 495-11 Telecom Cabling at 802 Grand in Glenwood Springs

Addendum 002 Issued March 24, 2011

1. There is no underground conduit in this project.
2. The MDF will be in the server room, which is the upper right-hand corner of the basement level drawing (A2.1). The precise locations of IDFs have not yet been determined. We expect to have two IDF closets per floor.
3. Because CMC has not determined the final distribution of employees in the building we have not determined the number of drops. We will provide additional information if and when it becomes available.
